WALTER CUTIÑO LEDO

BACK-END DEVELOPER | FULL-STACK JUNIOR

ABOUT ME

Junior Backend Developer with a degree in DAM (Developments of Multiplatform Applications), specialized in Java and Spring Boot. Experience in REST API development, layered architecture, and relational database management like MySQL. Focused on creating efficient solutions with clean code and best practices.

EXPERIENCE

Developer and Customer Support

MAR 2025 - JUN 2025

Novacenter del Sur (Practices)

- Provided technical support and resolved issues related to enterprise software
- Managed and maintained database systems
- Developed Java applications to automate internal business processes
- Integrated software solutions with MySQL databases and backend services
- Enhanced operational efficiency through improved license management processes

Restaurant Web Development Project (Personal Project)

SEPTEMBER 2025 - DECEMBER 2025

Flor de Tuna - Restaurant

- Designed and developed a corporate website for a restaurant focused on customer acquisition and conversion
- Implemented a multi-page structure including menu, reservations, gallery, and contact sections
- Optimized user experience, navigation, and responsive design across devices
- Applied technical SEO best practices, including semantic HTML, indexation-friendly architecture, and web performance improvements
- Optimized page load speed and performance with a focus on Core Web Vitals metrics
- Prepared the project as a reusable template for future clients
